

# SR-201 Over 3200 West Bridge Rehabilitation

## Project Overview

The Bridge Deck Rehabilitation Project is located on State Route 201 at 3200 West. Crews will demolish the two bridge decks on SR-201 and replace them with new, smoother driving surfaces. Drivers should expect delays of more than 30 minutes on SR-201 during peak travel times.

3200 W. is scheduled to be closed to traffic under the SR-201 bridge during construction. Traffic on SR-201 will be detoured down and up the ramps in a free-flow condition with right-in/ right-out access at 3200 W. Construction is anticipated to start July 2024 and will take approximately six months to complete.

**Drivers are encouraged to take I-80, I-215, Redwood Road, 3500 South, and other alternate routes to avoid delays.**

This project will bring significant benefits to our community, including:

- **Enhanced Safety:** The new bridge decks will provide a safer driving experience.
- **Accelerated Timing:** The project is designed for efficient execution to minimize disruptions and complete the rehabilitation swiftly.

## Need Help Getting Around?

- **Call us for Assistance and Discount Codes:**
  - Contact us at 801-251-6254 to navigate around the construction zone and receive discount codes for Lime Scooter rides and get discounted UTA passes.
- **Special Assistance:**
  - If you require special assistance, such as Paratransit options, please call us. We are here to help ensure your transit needs are met during construction.
